

Figure 1

Major Milestones and Growth of SK-II from the 1970s to 2014

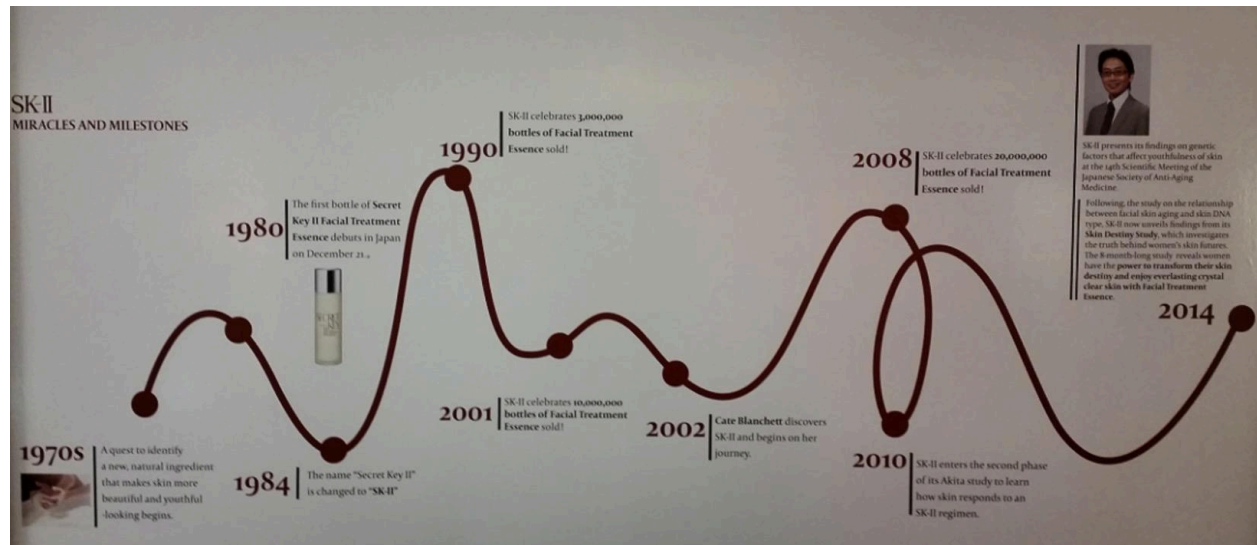

Figure 1 presents the major milestones of SK-II from 1970s to 2014. As shown in the timeline, the SK-II achieved significant growth through product development and increasing sales. It includes the launch of Facial Treatment Essence and major sales accomplishments. With these achievements SK-II may continue to grow and strengthen its position in the skincare market. It may increase its popularity among consumers for future innovations. The timeline shows that continuous improvement and innovation contribute to long-term growth of the business. It also shows the importance of discovering new things for future customer needs. It is expected that SK-II will continue developing products supported by research and technology. SK-II is also likely to maintain its reputation of quality skincare products. Therefore, SK-II should continue investing in research and product innovation. Applying Customer Value Principle, the SK-II should focus on delivering benefits and satisfaction to customers. It should also strengthen its customer engagement and strategies to stay consistent with its competitive advantage.
